

We believe your school website must be

streamlined

to deliver essential information only while

social media

reflects your school's truly dynamic nature to

engage parents

in ways that enable them to become invaluable

school advocates

naturally...it must look very good on any device

There's no rule that says a school with a long history can't have a 21st Century look online just like a new build school or academy.

There's only one thing you need to do when your new website arrives, and that's 'move in' with our **launch training session**

We design, brand, host and migrate *content into your new site and give you the training to enable you to update it during the year.

We host your website securely in the UK, back it up daily, support you and have an optional pay-as-you-go professional design service at your disposal too.

*The Government requires all maintained schools to publish specific information on their website to comply with 'The School Information (England) (Amendment) Regulations 2012.'
